

## LIST OF APPROVED ABSTRACTS

### WATERSHED MANAGEMENT

#### **Multisectoral Water Resource Management: The Case of Copiapó and the Contribution of the Mining Industry**

Felipe García, Juan Pablo Saavedra and Andrea González, JRI Ingeniería, Chile

#### **A Socially Sustainable Approach for Intensive Use of Aquifers in Northern Chile**

Orlando Acosta, Cía Minera Doña Inés de Collahuasi, Chile

#### **Watershed Management in Arid Zones: The CAMINAR Project in the Elqui River Basin, North-Central Chile**

Guido Soto, Manuel Soto and Michelle Senoret, Centro del Agua para Zonas Áridas y Semi-áridas de América Latina y del Caribe (CAZALAC), Chile; Jaime Amezaga and Tobias Roetting, HERO Group, University of Newcastle, England; Luis Ribeiro, Ana Buxo and João Nascimento, Instituto Superior Técnico, Universidad de Lisboa, Portugal; Chris Beggs and Marcela Venegas, Schlumberger Water Services, Chile; Nicole Kretshmer and Karine Orth, Centro de Estudios Avanzados en Zonas Áridas (CEAZA)-Universidad de La Serena, Chile; Jorge Oyarzun, Hugo Maturana and Ricardo Oyarzun, Departamento Ingeniería de Minas, Universidad de La Serena, Chile

#### **Water Efficiency in Shared Use with El Loa Farmers**

Nelson Tapia, Xstrata Copper Lomas Bayas, Chile

#### **Managing the Cumulative Impacts of Mining - Suggestion for a Chilean Model**

Peter Smith and Paul Howe, SKM, Australia; Jan Van Hooydonck, Artois Consulting, Chile

#### **A Quest for the Legal Framework for Water Use in Mining - Southern African Context**

Tushar Kanti Saha, National University of Lesotho

#### **SES of Scanty Water in Mining Industry and Agriculture, Case of Qda. Honda: Social and Technical Experience**

José de Piérola, Southern Peru Copper Corp, Peru

#### **The Calama and Quillagua Oasis: A Common History, Two Contrasts, a Happy Ending?**

José Delatorre, H. Rojas, M. Sánchez, I. Delfino, Universidad Arturo Prat; Nelson Tapia, Xstrata Lomas Bayas, Chile

### WATER SUPPLY

#### **The Risk of an Extreme Drought for the Chilean Mining**

Juan Rayo, JRI Ingeniería, Chile

#### **Water Supply for Quellaveco Project**

John McCartney and David Sellars, Schlumberger Water Services, Chile; Aldo Brigneti, Anglo American Quellaveco, Peru

**The Potential Impact of Climate Change on the Quellaveco Project Water Supply**

John McCartney and David Sellars, Schlumberger Water Services, Chile; Aldo Brigneti, Anglo American Quellaveco, Peru

**Risk Analysis in the Management of Water Supply System in Mining Operation in Southern Peru**

Jose de Piérola, Southern Peru Copper Corp, Peru

**Water Management in Arid Areas: Potential for Beneficial Use of Oilfield Brine in a Remote Semi-Arid Environment**

Andrew Fletcher, David Mulligan, Thomas Baumgartl and Mansour Edraki, Centre for Mined Land Rehabilitation, Sustainable Minerals Institute, The University of Queensland, Australia

**Saline Groundwater: An Alternative for the Sustainable Exploitation of Andean Highland Groundwater Reserves**

Orlando Acosta, Cía Minera Doña Inés de Collahuasi, Chile; Pablo Rengifo and Edgardo Dzodoryk, Geohidrología Consultores, Chile; José Francisco Muñoz, Universidad Católica de Chile

**Use of Deep Groundwater Reserves: A Challenge for the Hydrogeological Management of Basins in the Future**

Pablo Rengifo and Edgardo Dzodoryk, Geohidrología Consultores, Chile; José Francisco Muñoz, Universidad Católica de Chile; Orlando Acosta, Cía Minera Doña Inés de Collahuasi, Chile

**Selection of Pipeline Corrosion Control Strategy and Impacts on Economics of Water Conveyance**

Sergio González and Marcelo Encalada, Hatch, Chile; Stephen Daughney and Antonio Vece, Hatch, Canada

**Analysis and Technical-Economic Optimization of a Long Distance Water Recovery System**

Jorge Serey and Arnaldo Santander, JRI Ingeniería, Chile

**Effective Use of Aquifer Storage and Recovery Technology to Help Supply Mine Processing Water in the Northern Chile Mining District**

Robert G. Maliva and Thomas M. Missimer, Schlumberger Water Services, USA

**Tertiary Treated Wastewater Recovery for Copper Flotation Processes in Compañía Contractual Minera Candelaria**

José Olivares and Sergio Armstrong, Cía Contractual Minera Candelaria; Leandro Herrera, Universidad de Chile

**NATURAL RESOURCES QUANTIFICATION AND MANAGEMENT**

**Application of Geochemical and Isotopic Tracers on the Evaluation of Sources of Water to Lagoons in the Salar de Atacama Basin**

Ramon Aravena, University of Waterloo, Canada; J. Salas, O. Cornellá and W. Von Igel, Amphos XXI Consulting, Spain; E. Guzmán, C. Tore, A. Fock and A. Henriquez, SQM, Chile

**GIS-Based Water Balance Analysis of the Huarmey Basin**

Saul Montoya, Robin Dufour and Katty Barzola, MWH, Peru

**Water Quality Assessment Of Elqui River Basin, North Central Chile, Using Multivariate Statistical Techniques**

Luis Ribeiro, Joao Nascimento and Ana Buxo, CVRM – Instituto Superior Técnico, Portugal; Nicole Kretschmer and Guido Soto, CEAZA, Chile; Tobias Roetting, University of Newcastle, UK; Michelle Señoret,

Jorge Oyarzun, and Hugo Maturana, Centro del Agua para Zonas Aridas y Semiaridas de América Latina y del Caribe; Ricardo Oyarzun, CEAZA and Departamento Ingeniería de Minas, Universidad de La Serena, Chile

**Management Tools for Meteorological Drought in Arid Zones**

Carlos Sánchez, Southern Peru Copper Corp, Peru

**Peñasquito Mining Project in Zacatecas, Mexico: High Environmental Responsibility of Water Supplying and a Hydrogeological Challenge**

Miguel Rangel, IDEAS S.C., Mexico; Armando Escarcega, Gold Corp Inc, Mexico

**DESALINATION**

**Sal or Desal: A Technical and Economical Comparison of Seawater Supply Options for the Mining Industry**

Raymond Philippe, Richard Dixon and Silvana dal Pozzo, Hatch, Chile

**Flexible and Sustainable Water Supply for Mines in Challenging Environments: Seawater Desalination Vessel Options Analysis**

Lisa Henthorne and Nick Dyrer, Water Standard, USA

**Seawater Desalination with Large Diameter RO Elements in Chile**

Henia Yacubowicz, Antonia Von Gottberg, Sergio Ribeiro and Tomás Carvacho, Koch Membrane Systems, USA

**Four Years of Operation: Ashkelon SWRO Desalination Plant**

Boris Liberman, Samuel Kramer and Michael Tramer, Ambient Technologies Inc, USA

**Prediction of Scaling of CaCO<sub>3</sub> in SWRO System: The Relationship between Saturation Index (SI), Stiff and Davis Saturation Index (S&DSI) and Induction Time**

Ruben Muñoz, Terek Waly, Maria Kennedy and Jan Schippers, UNESCOo-IHE, Institute for Water Education, Department of Urban Water and Sanitation, The Netherlands; Geert Jan Witkamp and Gary Amy, Delft University of Technology, The Netherlands

**Prediction of Scaling of CaCO<sub>3</sub> in SWRO System: Impact of the Ionic Strength on the Estimation of the Concentrate PH by a Theoretical Approach**

Ruben Muñoz, Terek Waly, Maria Kennedy and Jan Schippers, UNESCOo-IHE, Institute for Water Education, Department of Urban Water and Sanitation, The Netherlands; Geert Jan Witkamp and Gary Amy, Delft University of Technology, The Netherlands

**Assessing the Behaviour and Dispersion of Desalination Discharge into Spencer Gulf, South Australia, Using a Three-Dimensional Numerical Model**

Peter Yeates and Jason Antenucci, Centre for Water Research, The University of Western Australia; M. Barry, D. Botelho and A Mcalister, BMT WBM Pty Ltd, Australia; J. Brook, Arup Pty Ltd, Australia

**Use of Alternative Intake Designs to Reduce Cost for Seawater Reverse Osmosis Water Treatment Systems Used to Supply Mines in Peru and Chile**

Thomas M. Missimer and Robert G. Maliva, Schlumberger Water Services, USA

**Long Term Experiences with Internally Staged Designs (ISD)<sup>TM</sup> in Large SWRO Desalination Plants**

Renato Ramos, Dow Water & Process Solutions, Brazil; Verónica García, Dow Water & Process Solutions, Germany

## **GROUNDWATER MODELLING – QUANTIFICATION AND MANAGEMENT**

### **Simulating Groundwater in Mining Works: A New Numerical Method for Highly Heterogeneous Case Studies**

S. Wildemeersh, S. Brouyère, Ph. Orban, J. Couturier and A. Dassarrgues, University of Liège, Belgium

### **Hydraulic Tomography for Accurate Characterisation of Subsurface Hydraulic Heterogeneity**

Walter Illman, University of Waterloo, Canada

### **Groundwater Vulnerability Mapping in North Eastern Alberta, Canada - Preliminary Results**

Ward Van Proosdij, Worsley Parsons, Canada

### **Regional Groundwater Quality Study And Monitoring Network Design In The Athabasca Oil Sands In Alberta, Canada**

Ward Van Proosdij, Worsley Parsons, Canada

### **A Hydrogeologic Conceptual Model in Support of a Regional Ground Water Flow Model Collahuasi Mine, Chile**

Mark Thomasson, Montgomery & Associates, USA; Lyle Davis and Michael Rosko, Montgomery & Associates, Chile; Orlando Acosta, Cía Minera Doña Inés de Collahuasi, Chile

### **Relationship between Hydraulic Conductivity and Degree of Cementation**

Beatriz Olivarez and Juan Luis Fernandez, Golder Associates, Chile

### **Groundwater Flow Modelling Applications in Mining: Scopes and Limitations**

Cristian Pereira, Claudia Martinez and Karem de la Hoz, SRK Consulting, Chile

### **Feasibility Assessment of a Mine Closure Plan by Combining Hydrological Daily Balance Models and Hydrogeological Numerical Simulations. A Case Study in La Respina Mine, Spain**

Clara Sena and Jorge Molinero, Amphos XXI Consulting, Spain

### **In Situ versus Drill Stem Hydraulic Testing in Deep Drill Holes: Costs, Risks and Data Quality**

Michael Royle and Dan Mackie, SRK Consulting, Canada; C. Neville, S.S. Papadopulos & Associates, Inc., Canada

## **MINE DEWATERING**

### **Dewatering Contribution to Reserve Estimation and Resource Development - A Case Study in Pilbara Region of Western Australia**

Shahran Sharafi, BHP Billiton, Australia

### **Use of Numerical Groundwater Modelling for Mine Dewatering Assessment**

Claudia Martinez and Vladimir Ugorets, SRK Consulting, Chile

### **Results of a 3-Dimensional Finite Element Groundwater Flow Model for the Rosario Pit Area, Collahuasi Mine**

Mark Thomasson, Montgomery & Associates, USA; Lyle Davis and Michael Rosko, Montgomery & Associates, Chile; Orlando Acosta, Cía Minera Doña Inés de Collahuasi, Chile

## WATER ACCOUNTING

### **Estimating Global Water Use by Copper Mining**

A. J. Gunson, Bern Klein and Marcello Veiga, Norman B. Keevil Institute of Mining Engineering, University of British Columbia, Canada

### **Water Balance Model of a Tailings Impoundment Using Field Data**

Felipe García and Pablo Vásquez, JRI Ingeniería, Chile

### **Evaporation Rate Modelling from Meteorological Conditions in the Framework of Evaporation Rate Reduction Studies at Lomas Bayas Mining Center**

Pamela Garrido, Universidad Católica del Norte, Chile; Luis Cáceres and Héctor Galleguillos, Universidad de Antofagasta, Chile; Yuri Zepeda, Xstrata Copper Lomas Bayas, Chile

### **Developing Water Balance Models as an Operation Tool for Sustainable Mine Water Management**

Sarah Gosling, SKM, Australia

### **Water Balance Studies in Iron Ore Mine Sites in the Quadrilátero Ferrífero, State of Minas Gerais**

Marcelo Diniz, Francisco Silva, Flávia Nascimento, Ana Paula Vianna and Márcio de Resende, Golder Associates, Brazil; Maria dos Santos, Vale, Brazil; Andre Rocci, Consultant, Brazil

### **Evaporation Estimates for Close Basins, Pampa Colorada, II Region**

Carolina Ahumada and Matías Ugarte, Schlumberger Water Services, Chile

### **Improving Water Management at Collahuasi Mining and Processing Operations by Implementing a Systems Approach**

Orlando Acosta, Cía Minera Doñas Inés de Collahuasi, Chile; Claire Cote, Centre for Water in the Minerals Industry, Sustainable Minerals Institute, The University of Queensland, Australia

### **Use of Stochastic Models and their Application in Mining Hydrology**

Solange Dussabat, Javier González and Guillermo Aguirre, Golder Associates, Chile

## WATER MANAGEMENT

### **Managing the Effects of Mining Operations on Groundwater Systems - A National Assessment Framework for Australia**

Paul Howe, Peter Smith and Thomas Demmer, SKM, Australia; Chris Moran and Sue Vink, Sustainable Minerals Institute, The University of Queensland, Australia

### **Water Management in Tropical Nickel Laterite Heap Leach Projects**

Mark Steemson, C. Sepulveda and M. Smith, Vector Engineering, Australia

### **Measurement of Mine Water or Effluent Flow in Open Channels or Closed Systems Using Tracer Dilution Methods for Calibration of Flow Monitoring Equipment /Systems**

John Sferazza and Mark Ugucioni, AMEC Americas, Canada

**Probabilistic Risk Assessment (PRA) Applied to Environmental Waste Management**

Paolo Trincherio, A. Delos and Jorge Molinero, Amphos XXI Consulting, Spain; D. Tartakovsky, Department of Mechanical and Aerospace Engineering, University of California, USA; D. Fernandez-Garcia, D. Bolster and X. Sanchez-Vila, Technical University of Catalonia, Spain; M. Dentzt, Departamento de Geociencias, Instituto de Diagnóstico Ambiental y Estudios del Agua (IDEA-CSIC), Spain

**Modern Water Management for the Minerals Industry**

Subasish Dutt and Chris Hughes-Narborough, Aker Solutions, UK

**Water Quality Assessment - Technological Basis for Water Management**

Flávio Vasconcelos, AECOM, Brazil

**Energy Consumption Indicators Associated with Water Resources Management in Iron Ore Mine Sites within the Quadrilátero Ferrífero, State of Minas Gerais**

Marcelo Diniz, Francisco Silva, Flávia Nascimento, Ana Paula Vianna, Aloysio Saliba and Márcio de Resende, Golder Associates, Brazil; Maria dos Santos, Vale, Brazil; Andre Rocci, Consultant, Brazil.

**Water Resources Management Plan for New Iron Ore Mines in the State of Minas Gerais, Brazil**

André Rocci, Consultant, Brazil; Mario Cicareli, Potamos Engenharia e Hidrogeologia, Brazil

**Water Management Policies in the Arid and Semi-Arid Areas of South America**

Christopher Beggs and Marcela Venegas, Schlumberger Water Services, Chile

**Water Footprint: An Emerging Sustainability Indicator**

Jorge Arrueste, Hatch, Chile

**Integrated Water Quality and Quantity Management Facilitating Water Re-Use**

Sue Vink and Chris Moran, Centre for Water in the Minerals Industry, Sustainable Minerals Institute, The University of Queensland, Australia

**EFFICIENT USE**

**Saving Water and Aqueous Waste in the Production of Concentrated Phosphoric Acid**

Baruch Grinbaum, Bateman Advanced Technologies, Israel; Raul Raiter, Arafura Resources, Israel

**Saving Water in Stripping of Uranium**

Baruch Grinbaum, Bateman Advanced Technologies, Israel

**Water Retained in Tailings: How to Reduce it?**

Sergio Barrera and Javiera Ortiz, Arcadis Geotécnica, Chile

**Technology Optimisation and New Sources to Enhance Water Availability for the Chilean Mining Industry**

Andrea González, Fernando Calle, Luis Castro and Felipe García, JRI Ingeniería, Chile

**Evaporation Loss Reduction in CMXLB Processes**

Yuri Zepeda, Xstrata Copper Lomas Bayas, Chile; Marcelo Jo, Xstrata Copper División Norte, Chile; Luis Cáceres and María Elisa Taboada, Universidad de Antofagasta, Chile

**Mine Water: Waste or Resource? Potential Uses of Mine Water in Industry and Environment**

Jorge Loredó, A. Marqués and E. García-Ordiales, Department of Exploration and Mining, University of Oviedo, Spain

**University-Industry Joint Project for Water Evaporation Reduction Studies at Lomas Bayas in Northern Chile**

María Elisa Taboada and Teófilo Graber, Universidad de Antofagasta, Chile; María Cecilia Hernández and Oscar Benavente, Universidad Católica del Norte, Chile; Marcelo Jo, Xstrata Copper División Norte, Chile

**Selecting Centrifuge Technology for Solid-Liquid Separation Tasks**

Stefan Koppe, Flottweg AG, Germany

**Potential Application of Water Management Tools to Mineral Concentration Plants**

Nathalie E. Jamett, Department of Chemical Engineering, Universidad de Antofagasta, Chile; Mario E. Mellado, Edelmira D. Gálvez and Luis A. Cisternas, Centro de Investigación Científica y Tecnológica para la Minería, Chile

**Reduction of Effluent Generation in the Mining Industry by Implementation of the Process Water Treatment Technologies**

Raymond Philippe, Hatch, Chile

**Water Use Efficiency at Codelco Norte**

Álvaro Hernández, Codelco Norte, Chile

**Online Measurement of Bed Height and Solid Concentration Profile in Thickeners to Increase Water Recovery**

Claudio Acuña, Mauricio Leiva and Susana Otárola, Chemical Engineering Dpt, Universidad Católica del Norte, Chile

**Enhancing Flow Behaviour of Mineral Tailing Paste to Increase Water Recovery in Concentrators**

Claudio Acuña, Sofía Mondaca and Leonardo Romero, Chemical Engineering Dpt, Universidad Católica del Norte, Chile

**EFFLUENT CHARACTERISATION AND TREATMENT**

**A Study of the Nature and Oxidation Kinetics of Iron Precipitates and Sources of Water in a Stream above Underground Mining Activities**

Hoang Phong Pham, Mansour Edraki and Barry Noller, Centre for Mined Land Rehabilitation, Sustainable Minerals Institute, The University of Queensland, Australia

**HW Process Technologies Engineered Membrane Separation (EMS) Systems for Hydrometallurgical Applications**

Larry Lien, HW Process Technologies, USA

**BX System: A Biological System to Remove Heavy Metals from Mining Wastewater**

Davor Cotoras and Fernando Valenzuela, Universidad de Chile; Pabla Viedma, Biotecnologías del Agua Ltda, Chile

**Technologies to Improve Water Conservation and Re-Use in the Mining and Metallurgical Industry**

Oscar Lopez, Bioteq, Chile; David Kratochvil, Bioteq, Canada

**Biotechnology Based Processes for Metal Recovery and Sulfate Removal**

Jacco Huisman and Martijn Olde Weghuis, Paques B.V., The Netherlands

**A Sustainable Approach to Treat Acid Mine Drainage and Dispose the Waste Streams: A Case Study**

Kebreab Habte, F.J. Marais and P. Gunther, Golder Associates, Canada

**Neutralisation of Acidity and Attenuation of Metals in Wastewaters Using Mineral-Based By-Products**

Laura Wendling, Grant Douglas, Shandel Coleman and Yuan Zheng, CSIRO Land and Water, Australia

**Contaminant Removal from Mining Wastewaters via Hydrotalcite Formation**

Grant Douglas, Laura Wendling and Ron Pleysier, CSIRO Land and Water, Australia

**Mine Water Treatment Using Recycled Concrete and Magnetite**

James Navratil and Andrew Akin, Hazen Research, USA

**Acid Drainage Generation in Arid Zones**

Carmen Gloria Dueñas and Angela Oblasser, Fundación Chile

**Probabilistic Water Quality Modelling Applied to a Mine Water Treatment Pond System**

Nicolas Lauzon and Nathan Schmidt, Golder Associates, Canada

**Coupled Modelling of Hydrogeology and Geochemistry as a Tool to Simulate Natural Attenuation Processes and Remediation Actions in the Context of Acid Mine Drainage Problems**

Clara Sena, Jorge Molinero, Fidel Grandia, David Arcos, Christina Domenech and Mireya Grive, Amphos XXI Consulting, Spain

**Chloride Removal from Brackish and Ground Waters by an Electrochemical Oxidation Process for their Use in the Mining Industry**

Naldy Miranda, Barbara Nieves and Javier R. Quispe, Centro de Recursos Hídricos para Zonas Áridas CEITSAZA, Departamento de Ingeniería Química, Universidad Católica del Norte, Chile

**Identification of Natural Clays in Soils from the Antofagasta Region for the Application in Mining Wastewater Treatment**

Paola Agüero, Constanza Fariña and Naldy Miranda, Departamento de Ingeniería Química, Universidad Católica del Norte, Chile; Nelson Alarcón and Barbara Fuentes, Centro para el Desarrollo de Tecnologías de Explotación Sustentable de Recursos Hídricos en Zonas Áridas, (CEITSAZA), Chile

**The Development of Semi-Autonomous Mine Water Treatment Systems**

Andre Sobolewski, AMEC Americas, Canada
